

$$1,57x + 10 \text{ m}$$

The diagram shows a rectangle with a circle inscribed in its top-left corner. The circle is tangent to both the top and left sides of the rectangle. A horizontal double-headed arrow above the rectangle indicates the total width is $1,57x + 10 \text{ m}$. A vertical double-headed arrow below the circle indicates the distance from the bottom edge of the rectangle to the bottom of the circle is 2 m .

$$2 \text{ m}$$
